

What do I need to open a PayPal Account? You'll need your e-mail address and your checkbook.

### How long does it take?

PayPal needs to confirm your bank account. It will take 2-3 days to complete this process.

### How does it work, and what will I need to do?

Here's the scoop ...

#### Step 1: Get Started

Go to [www.paypal.com](http://www.paypal.com)

#### Step 2: Sign Up

Under **New User?** click **Sign up**

Click **Personal Account** and choose your country, then click **Continue**

Fill in the fields, then click **Sign up**

This will take you to a screen that says "Account Sign Up". This screen will explain the next steps to you. You'll receive an e-mail at the address you provided when you filled in your personal information. That e-mail will contain a link back to PayPal. You'll need to verify your e-mail address and password by clicking on this link.

Click **Confirm**

#### Step 3: Link PayPal to Your Bank Account

After entering your password, your e-mail will be confirmed and you can now set up your bank account.

You will need your **bank name** and your bank **routing number** and **account number**. The routing number is usually the first number on your check, and is usually a nine-digit number. Click **Add Bank Account**

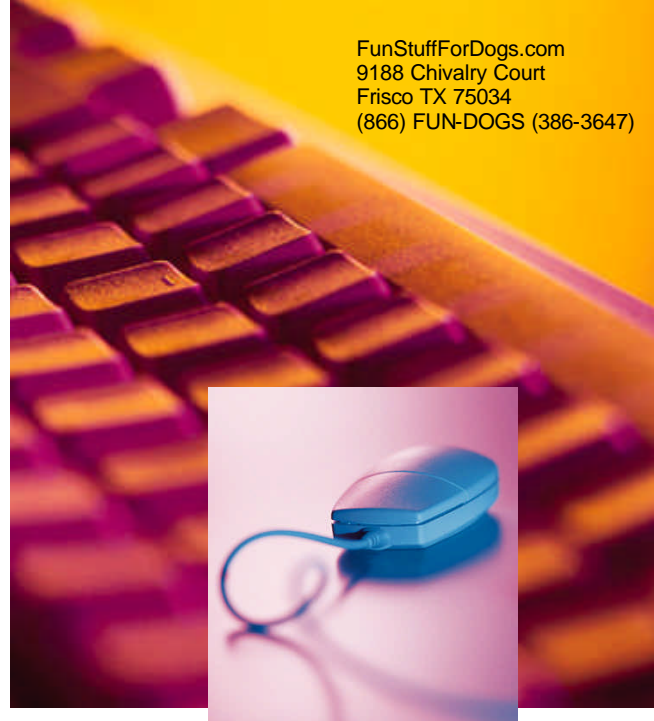

Paypal will make two small deposits (a few cents) to your account. In 2-3 business days, check your account and note the amounts of the deposits from "Paypal.com". Log in to your PayPal account and click the **Confirm Bank Account** link on your **Account Overview** page.

Enter the exact amounts and your bank account will become confirmed and click **Continue**. This takes you to the **Account Overview** page.

**That's it!** You've opened a PayPal Account! You can now pay for online purchases electronically through your checking account, without using a credit card. If you have questions about this process, you can access 24-hour help through PayPal.
